

COMPETITIVE ADVANTAGE

Coaches agree that a Bunt Zone™ Infield Protector can significantly improve bunting skills when used at every practice session. Over a season, this can provide a definite competitive advantage to teams using it regularly.

A Bunt Zone™ Infield Protector stimulates a natural game competition between team members, resulting in better bunting performance. Its multi-color design creates a “fun” atmosphere for what before was considered the most boring part of batting practice... bunting. Notice the high interest level shown above by so many players. Has your bunting practice ever been like this?

MATERIALS & SPECIFICATIONS

- Constructed with a special 9 oz. vinyl coated polyester mesh, an industrial grade material with UV and mildew inhibitors. Highly tolerant of spike traffic. All seams are fusion welded. This is NOT the flimsy 5 oz. or 7 oz. mesh used in most standard infield protectors.
- Full perimeter is hemmed around 1” webbing reinforcement and double-stitched with the best UV-resistant thread. Grommets (10) installed at corners and color change points. Special heavy duty “shepherd’s hook” ground staples (10) are included.
- 3 Standard sizes: *Large: 20’ Deep x 24’ x 64’ Medium: 15’ Deep x 24’ x 54’ Little League: 15’ Deep x 18’ x 48’*
- Custom sizes and colors are available at a slightly higher price.
- **ALSO AVAILABLE:** – Separate Yellow and Red Zones to overlay on your existing protector.
– Bunt Zone™ Mesh Target Mat sized to fit inside your batting cage.
- Bunt Zone™ Infield Protectors, Cage Zones, and Separate Zones are PATENT PENDING.

Bunt Zone™ Products are sold exclusively by Authorized Bunt Zone™ Dealers.
