

# **BUNT ZONE™**

## **Infield Protector**

*The only infield turf protector that doubles as the perfect bunting practice target training system.*

**PATENTS PENDING**

**BUNT ZONE™** Infield Protector provides instant feedback with color-coded bunting target zones.

■ **YELLOW** = **BUNT-FOR-A-HIT** target area.

■ **GREEN** = **SACRIFICE BUNT** zones.

■ **RED** = **BAD BUNT** zone.

**Coach Harry Tholen** says "The Bunt Zone Infield Protector is an exciting baseball teaching aid that will help batters learn the lost art of bunting. Visualization is the key. We coaches tell batters where and how to bunt, but not everybody responds to verbal instruction. With Bunt Zone Protectors, they can SEE exactly WHERE to bunt successfully. It gives immediate feedback even when coaches aren't present. And best of all, it's built into a tough mesh infield turf protector that we can use every day at every practice. This is a permanent, always-on training system, not like the cones and other gadgets we've used occasionally. The Bunt Zone Protector can improve bunting skills at all levels of baseball."

*Harry Tholen, Head Baseball Coach, Santa Fe Community College, Gainesville, FL. President of NJCAA Baseball Coaches Association, NJCAA Coaches Hall of Fame, American Baseball Coaches Association Board of Directors.*
